LARGE ROAD SWEEPER

10/2021

VS14  
THE MONSTER

INDIVIDUAL. ROBUST. ABSORBENT.

**BROCK**

# VS14

INNOVATIVE  
SWEEPING TECHNOLOGY  
MADE IN GERMANY

## THE MONSTER

A maximum capacity of 14 m<sup>3</sup> for dirt and 3,000 litres for water, with an additional water tank the machine achieves a total water volume of up to 10,000 litres. Maximum performance make the VS14 an extremely powerful sweeper on roads and construction and construction sites, especially for highly demanding cleaning operations.

Large sweepers from BROCK Kehrtechnik GmbH are innovative sweeper bodies made in Germany paired with the chassis types favoured by customers. Efficient modern drive concepts form the interface between chassis and sweeper body. The sweeper body can, for example, be equipped with an additional superstructure engine in accordance with country-specific exhaust emission standard or a hydrostatic drive that allows the machine to travel at an optimum sweeping speed.

The sweeping units are just as freely selectable as the type of drive. The robustly designed sweeping unit types can be freely selected and combined from the BROCK modular system to suit their future areas of application. Whether double plate broom on one side or simple plate broom on both sides? The modular principle offers a wide range of possibilities.

In addition, the BROCK sweepers can be equipped with many sophisticated accessories. This increases and specialises the range of applications for each sweeper. Additional equipment such as the leaf suction unit is particularly suitable for municipalities and can be used there in a variety of ways.

## TRENDSETTING

Modern drive concepts guarantee that the strict emission guidelines of the European Union are met and ensure **clean streets and less pollution for humans and the environment.**

## DIVERSE VERSIONS

### SWEEPER UNIT

Auxiliary engine	•
Hydrostat (only with a manual gearbox)	•

### CHASSIS

Automatic	•
Manual	•

## SWEEPING WIDTHS

Depending on the additional equipment, a sweeping or washing width of 2,500 mm to 5,050 mm is possible.

**Your sweeper as individual as you are - that is our strength.** We find the perfect solution for your cleaning work. With a multitude of possibilities and variations, your machine becomes the ultimate cleaning professional.
